I am writing regarding the Reactjs Developer opening that I saw on your company website. I am confident that I have the skills and experience that would make me the perfect candidate for the job.

I have worked as a React Developer intern for 4 months and I was responsible for building end-to-end functionality of the dashboard, login & logout page, Account section, table etc. I was also responsible for integration with the backend using RestAPIs. and I have gained a lot of experience in the field. I am well-versed in all aspects of React development, from setting up the environment to integrating it using Axios with Back-end. I am also familiar with Material-Ui(MUI) and other build Libraries.

In addition to my React development skills, I am also an expert in HTML, CSS, and JavaScript. as I have worked as a JavaScript developer for months I have a deep understanding of the latest web development trends and technologies. I am confident that I can quickly adapt to new technologies and trends and can be a valuable asset to your team.

I have attached my resume for your review and would be happy to answer any questions you may have. I look forward to hearing from you soon.

Sincerely,

Chirag Mandyal
